

## **Crochet Libraret**

### **Where your crafting ideas can come to life!**

Crochet Libraret (Cro-shay Librar-ay) Is a library application that will give users access to patterns for different types of clothing, allowing them to scroll through potential projects for inspiration/walk throughs for their own ideas. Oftentimes, as someone who crochets, I will get tired of creating the same item over and over again but won't have an idea for a new type of project simply because the potential options are overwhelming. With this application, project inspiration as well as instructional guides will be available together as yarn enthusiasts search for inspiration for their next big project .

### **App functions**

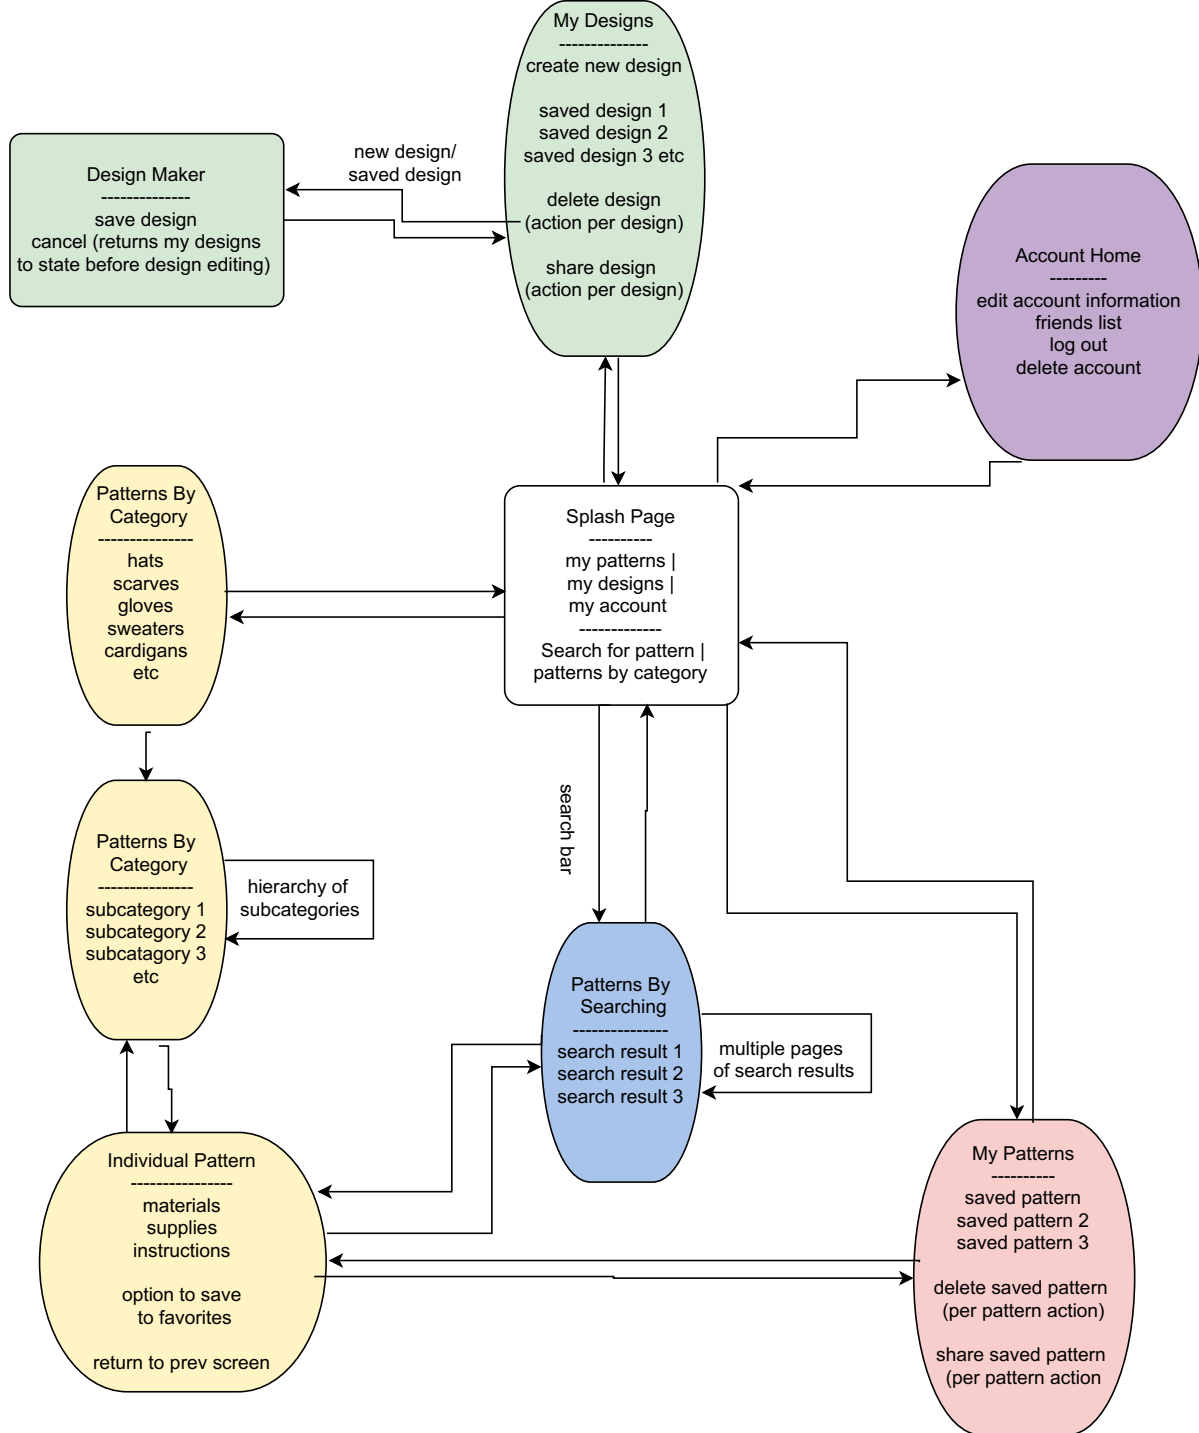

1. Contain easily navigable crochet/knitting patterns grouped by category (clothing, pillows/blankets, amigurumi figures)
2. Allow users to favorite patterns and access their list of favorites
3. Provide a pattern-designing grid (similar to <https://www.stitchfiddle.com/en/c/new>) for users to create patterns to reference while making their designs
4. the ability to save and refer back to these pattern-design grids

### **User Research: Target Audience**

Professional crafters, Amateur crocheters, beginners looking to improve skill, People who run crafting workshops and are looking for an educational tool

#### **Amateur Crocheter Profile: Michael, 25**

Michael is a relative beginner to crocheting and he picked it up recently during the first year of the pandemic. He enjoys crocheting but feels a bit overwhelmed when it comes to figuring out his next project. He wants to be able to easily look at references for project inspiration, despite not knowing where he wants to start, *and* find a reputable pattern to use for it without having to spend time searching for it.
